PROJECT AGE – The Learning Age

Videos describing the project process are also available on our You Tube channel. Don't forget to subscribe **DESES3 YT**

In the project AGE, a team from the SEIT Lab organisation from the University of Cyprus in Nicosia is developing reports through pilot testing and evaluating the current status of the results. SEIT Lab is building confidence in the quality of the project team's work.

THE NEWS

We are delighted to share another result of intergenerational collaboration on “The Learning Age” project, Youtube channel. After a few months of improving their digital skills and receiving one-to-one mentoring from the young people, the seniors are sharing what they have learned on videos. They talk about their home and heritage, how to take care of our health, and how to contribute to civil society through active participation, among other values and traditions that need to be preserved over time. All videos are available with subtitles in several languages.

WHAT'S NEXT

The next step of the AGE project will focus on Multiplier Events in Spain, Romania, Cyprus and Poland. The events will be an opportunity to present the results of AGE project with local community, and to promote intergenerational activities through the Erasmus+ programme.
